

FARES MOHAMED MOSTAFA

FRONT-END DEVELOPER

+20 1122620225 +20 1124711424 fares.dev.m@gmail.com [LinkedIn](#) [GitHub](#) Cairo, Egypt

Summary

Front-End Developer with strong experience in building responsive and accessible web applications using modern technologies like React, Next.js, Tailwind CSS, and TypeScript. Skilled in turning designs into clean, high-performance user interfaces with a strong focus on UI/UX. Comfortable working in Agile environments, using tools like Git, Jest, and Ajax to deliver scalable and maintainable solutions. Passionate about continuous learning and contributing to innovative, user-centered projects.

Experience

Full Stack Developer – Remote Freelancer 20 Oct 2024 – 9 Nov 2024 [live demo](#)

- Built a full-stack fashion styling web application using the MERN stack (MongoDB, Express.js, Next.js, Node.js).
 - Developed a responsive, bilingual UI (English & Arabic) using Next.js and Tailwind CSS, with attention to accessibility and user experience.
 - Implemented features including user authentication, multi-image upload, image processing (WebP conversion, resizing), and category-based management.
 - Integrated Firebase Storage for handling images and built custom APIs for data management.
 - Used Context API for state handling and managed source control via Git/GitHub.
 - Delivered a fully functional and scalable platform for organizing and styling outfits.
-

Projects

Personal Portfolio Website [live demo](#)

- A fully responsive personal portfolio website built with Next.js, React, Tailwind CSS, and Framer Motion.
- Showcases skills, projects, and contact information with smooth animations and a clean, modern layout.
- Designed to reflect strong UI/UX principles and optimized for all screen sizes.

Travel Web App [live demo](#)

- A responsive travel website built using Next.js, TypeScript, and Tailwind CSS, designed for effortless trip planning and smooth user navigation.
- Allows users to explore travel destinations, find accommodations, and plan itineraries through an intuitive interface.
- Utilizes Next.js server-side rendering for optimal performance and SEO.
- Tailwind CSS provides a sleek, modern aesthetic with focus on usability and responsive design.

Dentist Booking Site [live demo](#)

- A responsive dental appointment booking platform built with React.js and Tailwind CSS for seamless scheduling and easy navigation.
- Allows patients to effortlessly book appointments, view available time slots, and manage bookings from any device.
- Features a clean, intuitive interface optimized for performance and accessibility.
- Includes a robust admin dashboard for dentists to analyze booking data, manage appointments, and track patient interactions efficiently.

E-commerce Mobile Back Cover Store [live demo](#)

- A fully responsive e-commerce website built using React.js and Bootstrap, designed for selling mobile back covers.
- Utilizes a JSON Server API to manage and fetch product data efficiently.
- Features a modern UI with Context API for global state management and smooth cart functionality.
- Includes authentication and sign-up APIs for secure user account handling.

E-commerce Car Store [live demo](#)

- A fully responsive e-commerce car store built using React.js, Next.js, TypeScript, and Tailwind CSS.
 - Features advanced filtering options by model, name, and year to help users find cars quickly.
 - Built with a robust API for efficient data handling, supporting real-time updates and smooth interaction.
 - Prioritizes responsive design and accessibility, ensuring an optimal experience across all devices.
-

Skills
